

CHRISTOPHER PRESENTATION

ChristopherKhut_TIA2

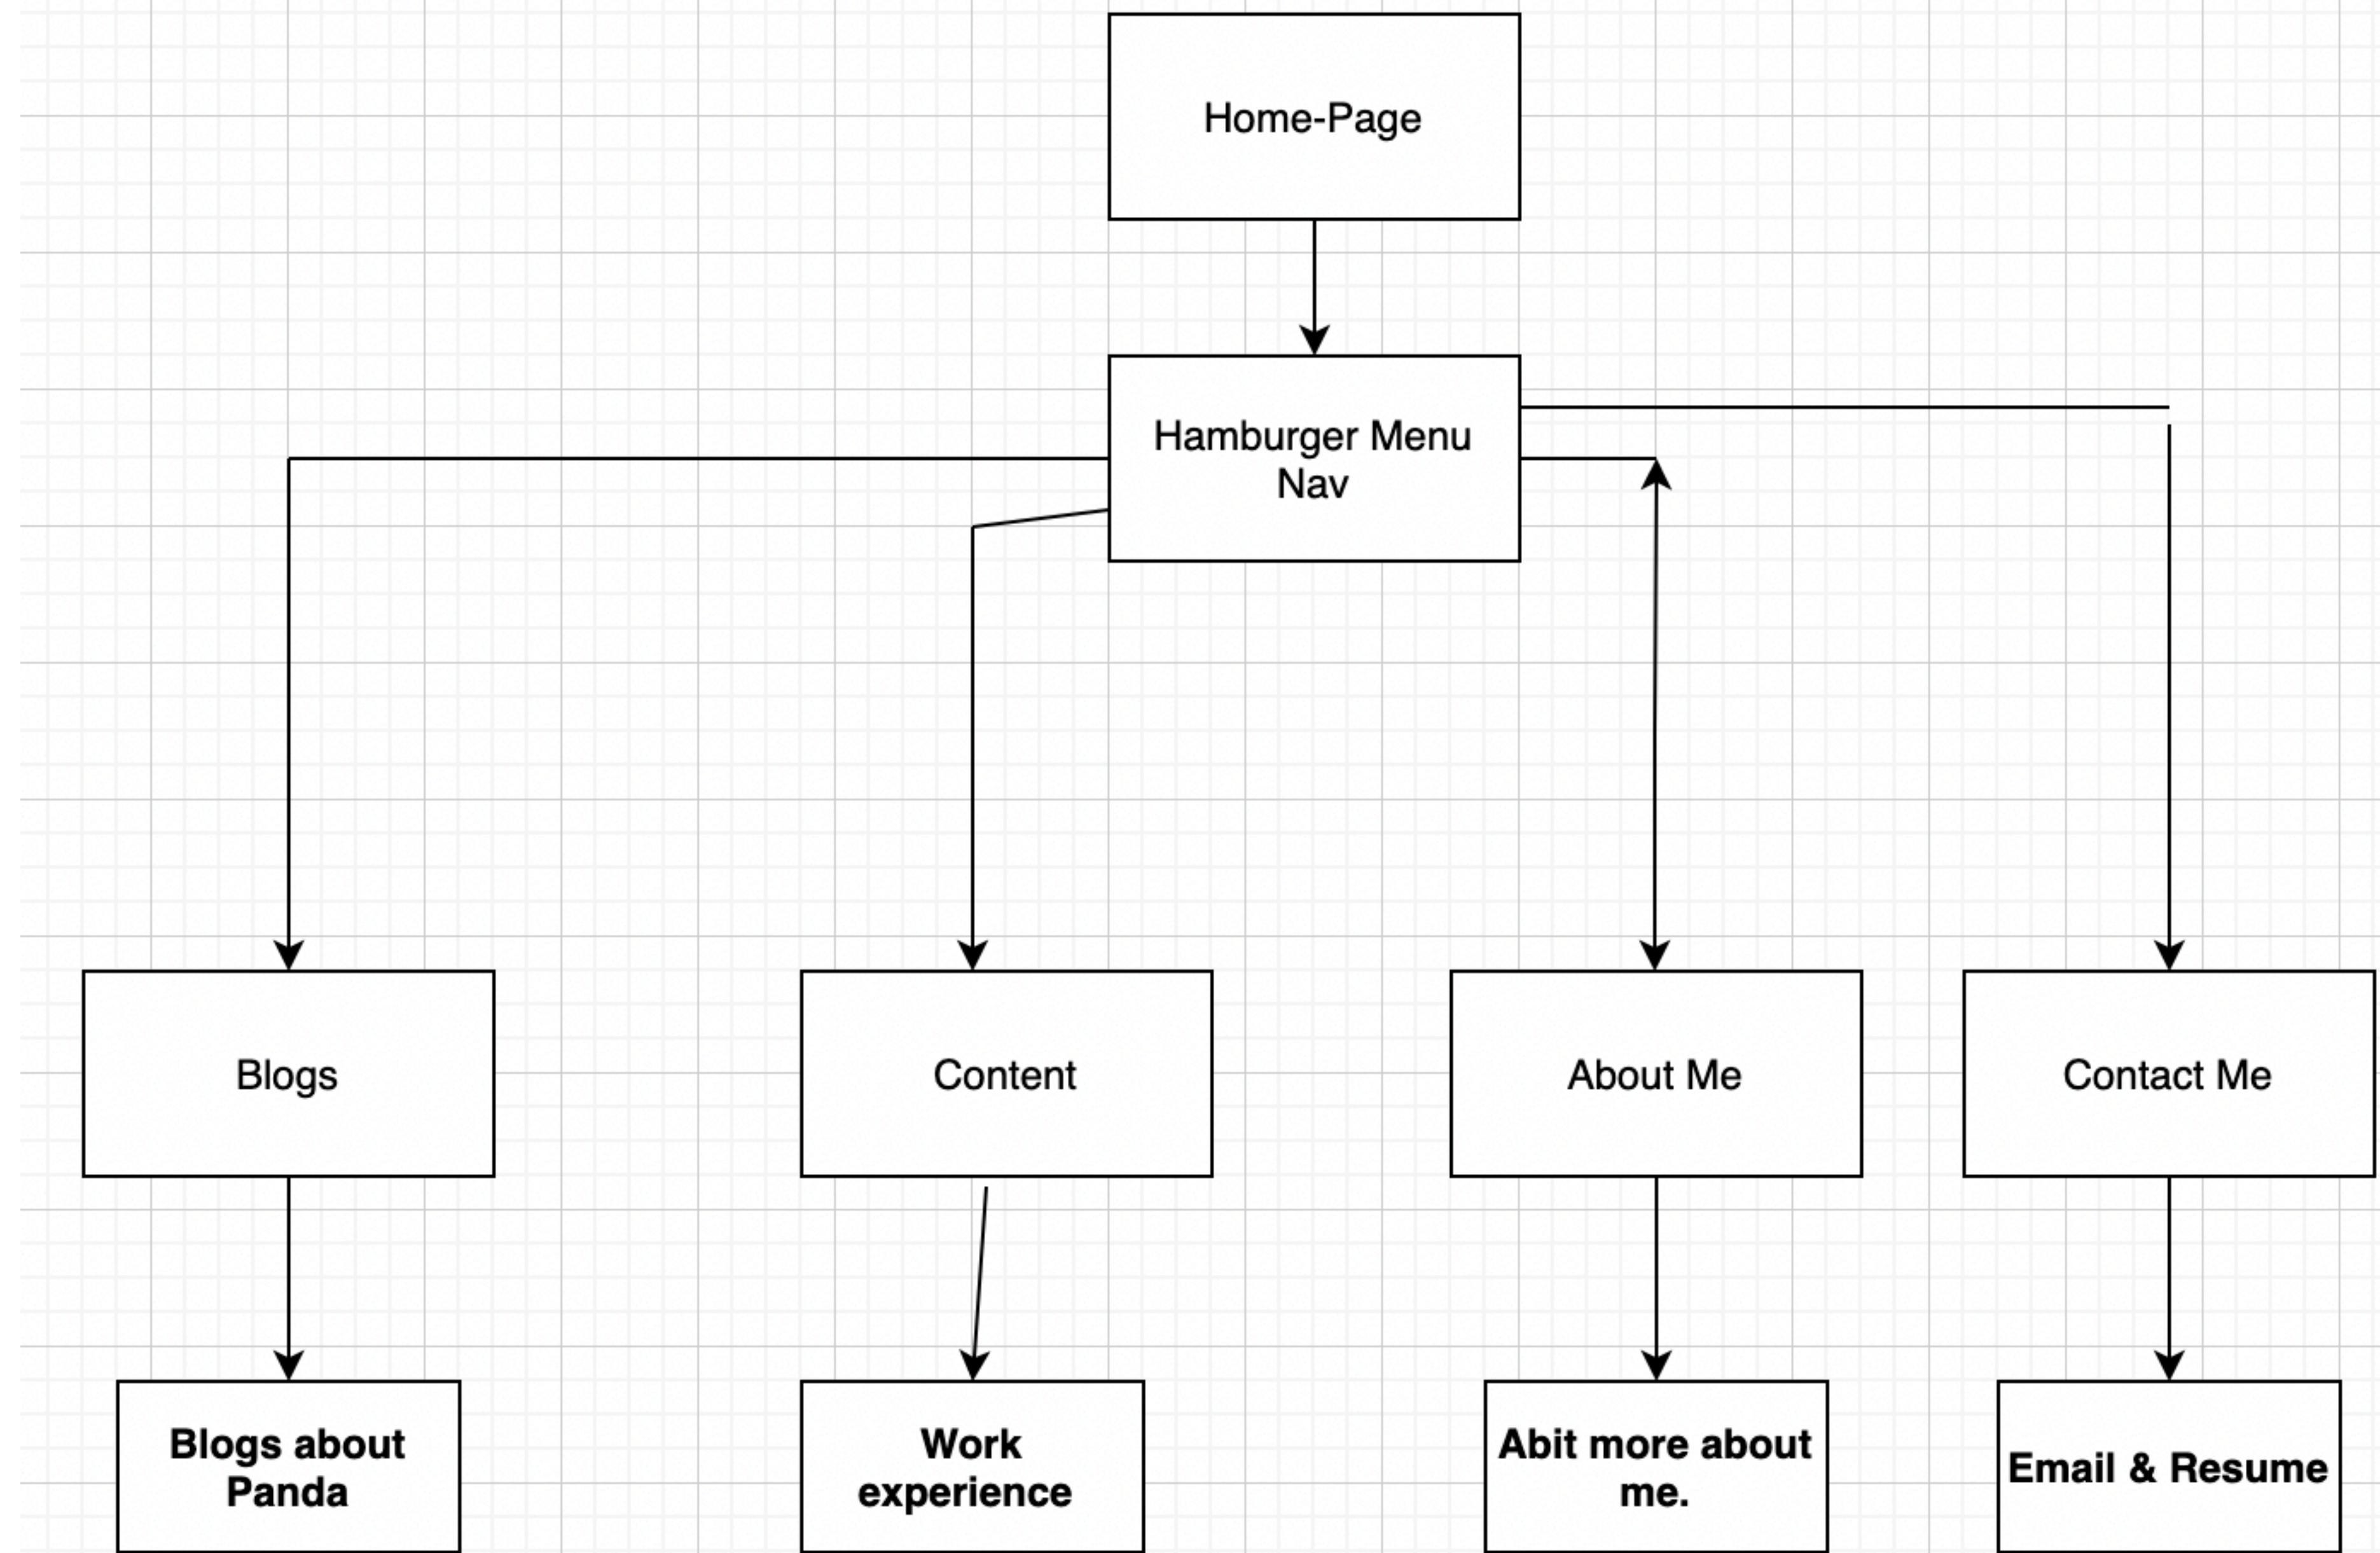

<https://christopherk.netlify.app/>

PURPOSE?

- Understanding more on components.
- Learning to debug more.
- Showing the audience on what I can do
- Getting a better understanding on how to build a website.

TECH STACK

- HTML & CSS
- Deployment on Netlify

FEATURES/COMPONENTS

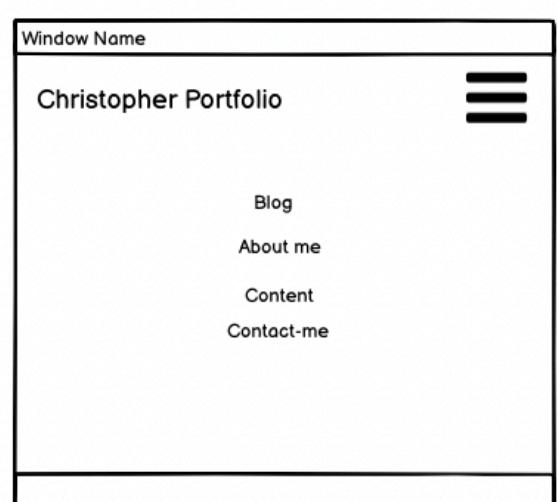

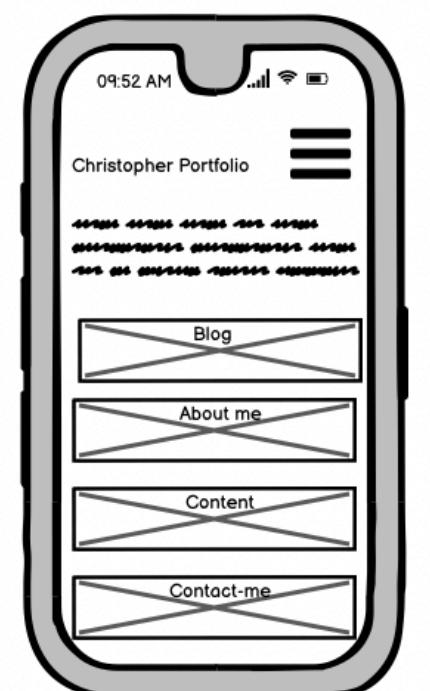

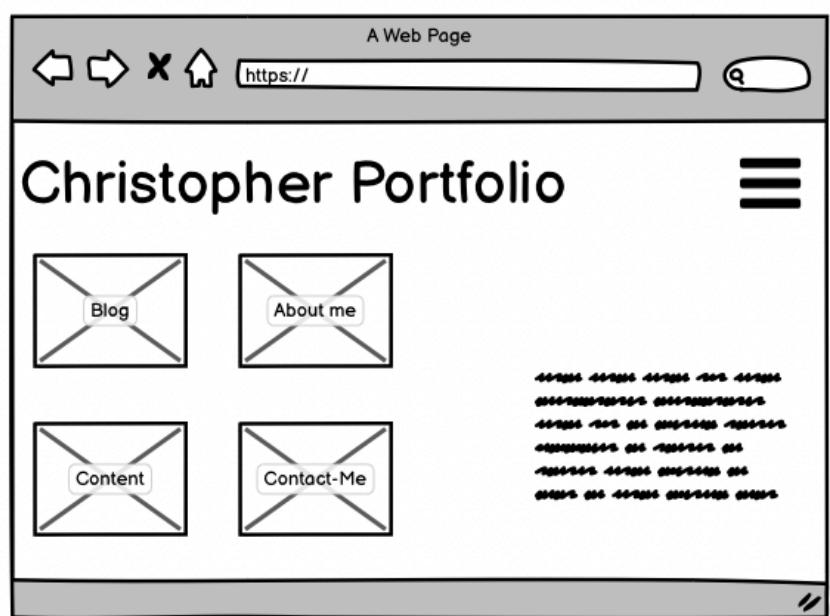

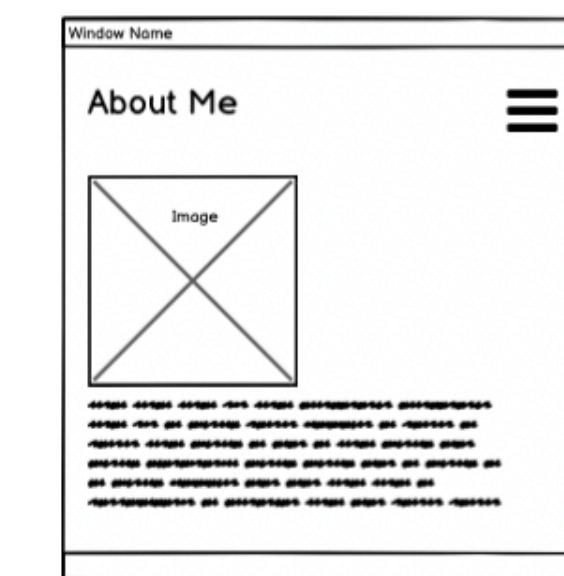

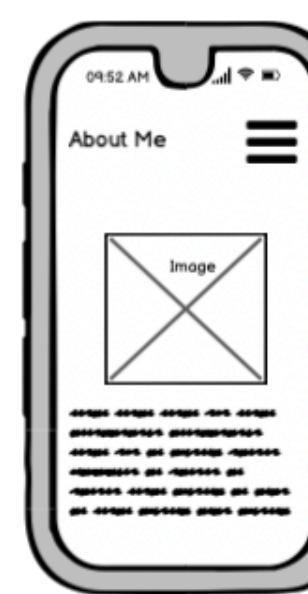

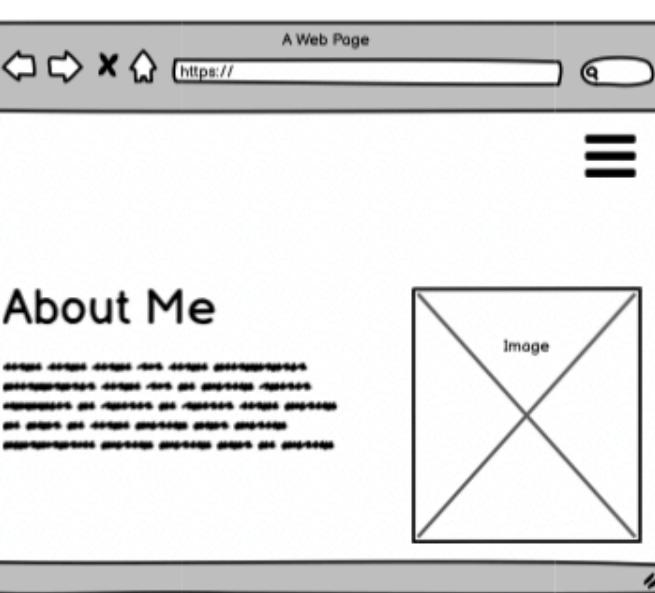

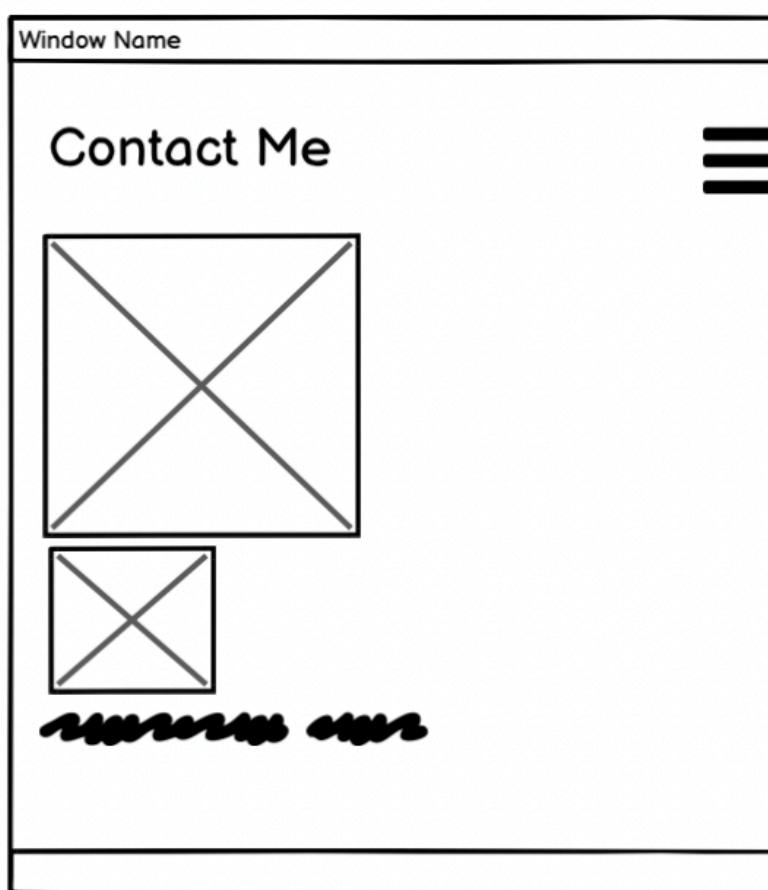

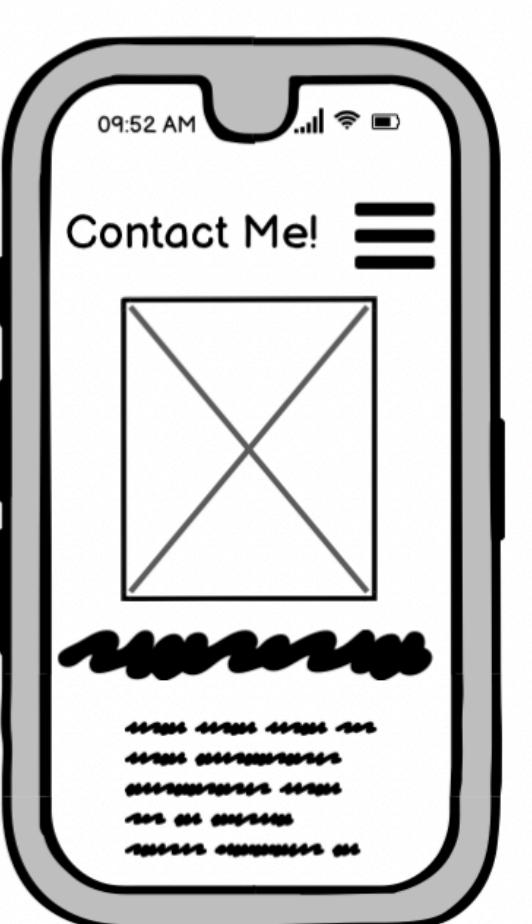

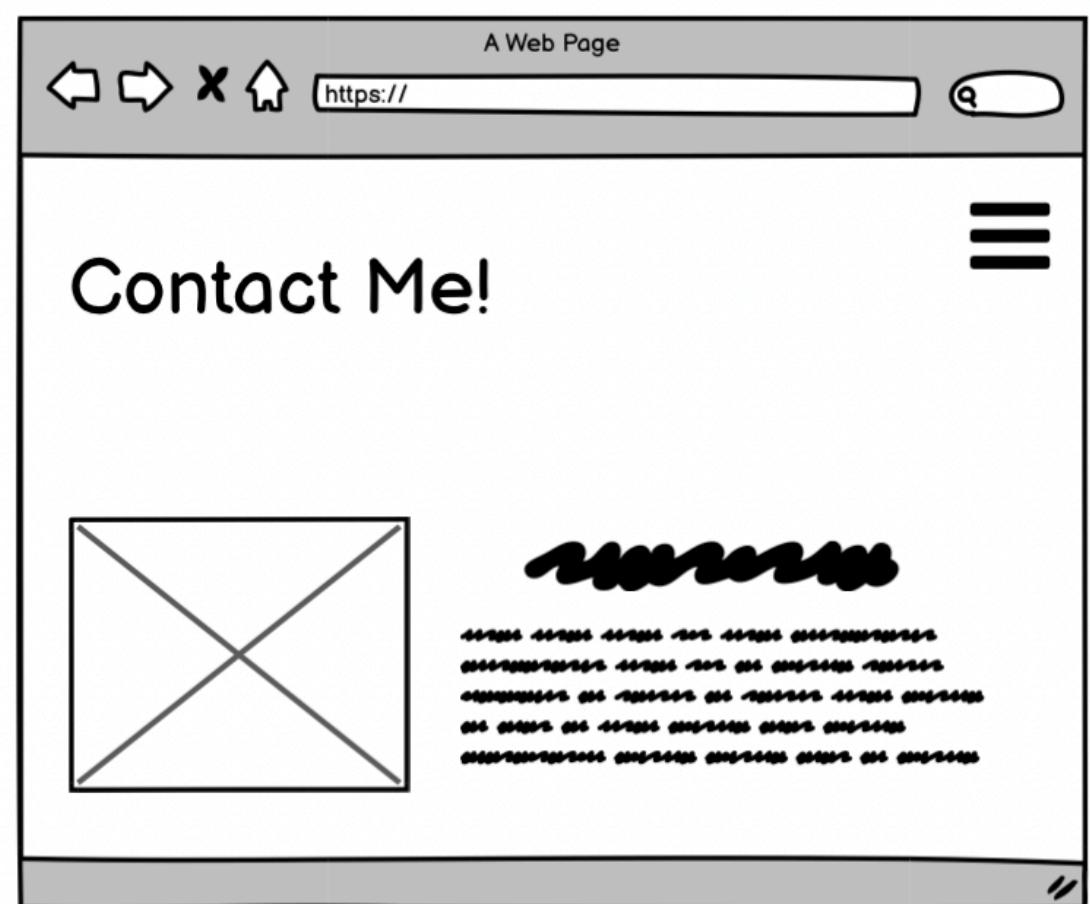

- 1. Hamburger Navigation bar**
- 2.CSS Animation/transition when hovering on links.**
- 3.Mailto components when clicking on email image.**
- 4.Able to download PDF resume through clicking images.**

DESIGN PROCESS & DECISION

With the design process I didn't pay much attention on it but instead I chose to focus too much on component...

Which was a big mistake.

For future I will consider more on researching on website and examples.

When opening
hamburger menu bar it
will open up and you can
choose where you would
like to go.

WHEN OPENING HAMBURGER BAR

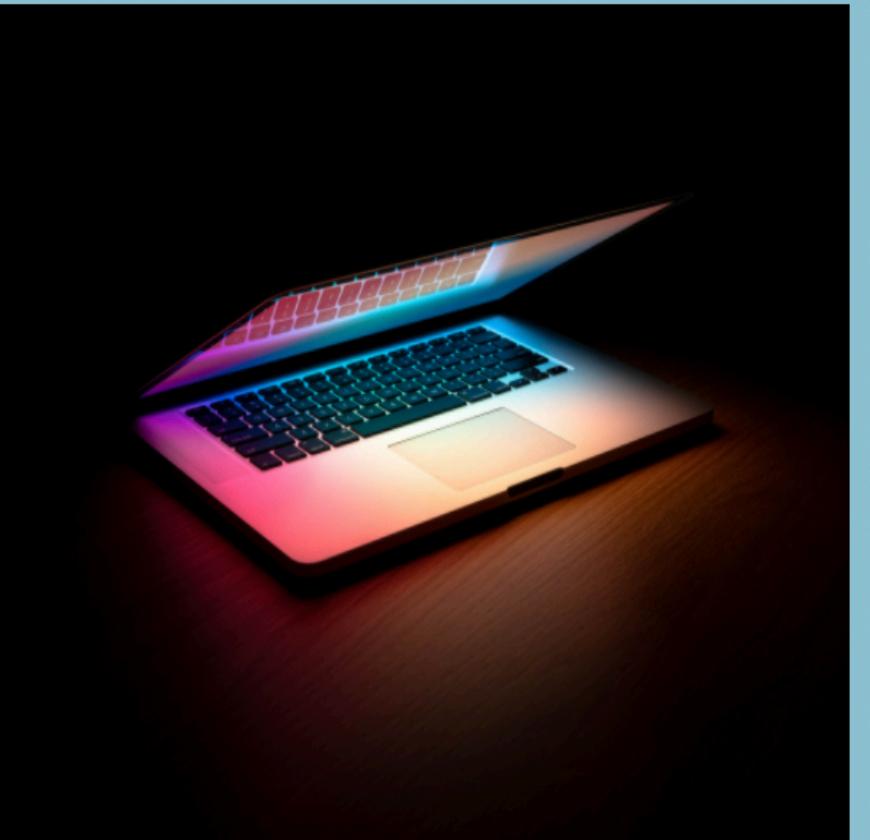

About Me

Hi! My name is Christopher! Been self studying coding for couple years now! Always been into coding ever since I was a kid. Always liked the idea of doing something myself and being to create something. The first time I actually wrote a piece of code was when I was live streaming on Twitch Platform and wanted a box to pop up on the screen every 10min to say "Hi! If you like my content don't forget to hit that follow button!" and ever since then I fell in love with coding!

😎 Reading books

😎 Watching Youtube Content about Coding

😎 Exercising

My experience and work history

Work History

Bartender 2014-2020
Forklift driver 2017-2020
Worked in multiple odds jobs through out my adult life.
Been self studying for a while. decided it time for me to start taking it serious.

Skills

Able to communicate efficiently
being to work independently
very Engaging and able to work within a team

Hobbies

Exercising in the morning
Spending time with my kitten
Learning more about coding.

Here are the links to my Github

If you like to contact me! Feel free to email me! Thanks!

- Hovering on image of email
- Click taken to Mailto default email
- Click pdf resume

CHALLENGES/ISSUE

- Not understanding flexbox enough
- Too focus on just components.
- Not researching enough on how a website design really looks like
- I should of got an inspiration on a website instead I chose to just splash everything together. Which was a horrible mistake.
- Should of design mobile first. Instead of desktop

FAVOURITE PART?

- Learning from my mistake and make sure for next assignment to be ready.
- Debugging issue and mistake
